

Нужно написать два сочинения на английском языке в объеме 150-190 слов по следующей теме:

Your local government wants to improve leisure facilities in your town. Your English teacher wants to know the opinions of the students at your language school.

Write a report for your teacher, explaining what facilities there are already in your town, what facilities aren't there, telling about the difficulties people have and recommending new facilities that would benefit teenagers.

При написании нужно только учесть, что речь пойдет о поселке, который находится далеко от больших городов. В поселке есть клуб, библиотека, музей, школа, детский сад и десяток магазинов. Во вложении рабочий материал уже написанных сочинений, но мне кажется, это не то. В любом случае, может быть их можно взять за основу.

1. 181 words

Throughout my life, I have been living in a village that is far from the city. I absolutely love my native village. But the conditions here are difficult, because we have almost no infrastructure necessary for modern life. I believe that beautiful paved roads will connect my small village with nearby villages, buses will run, and people will be able to get to any place without any problems. New beautiful well-maintained houses will grow; a modern large enterprise will be built and will work using the natural resources of our area, a kindergarten, a theater and a Museum, a hospital and a Church, a large modern store, a cultural center and a computer center will be opened. Then all people will have the opportunity to work where they like, while being close to home. The standard of living of my fellow villagers will not differ from the city. Natural gas will come to every home. There will be computers with Internet access in the homes of villagers. And then no one will leave the village in search of a better life.

2. 173 words

The life here, in the countryside it is difficult, since there is practically no infrastructure and the city is too far. Improve the town and make it comfortable and good for people to live in, is a task that should be solved by the head of the town. Recently, the head made a number of proposals for the improvement of the town and the life of teens, which seemed necessary to me. First, he proposed to build and design a Playground, a small sports town, and install benches and gazebos for recreation. Secondly, was proposed to plant more green spaces, flower beds in the summer to please the eye. And in winter, build an ice town-figures of snow and ice, pour a box-skating rink, for skating lovers. And, third, and most importantly, he suggested to open a good mixed goods store with a decent

assortment and relatively low prices, so that everyone could buy what they needed. I believe that these changes will allow our village to take small steps closer to modernity.
